Bridge Replacement Project Continues

Harrisonburg, Va. – The Harrisonburg Public Works Department continues managing the project to replace the bridge on Pleasant Valley Road.

This replacement project, located in the 300 block of Pleasant Valley Road, is being done because the bridge is considered structurally deficient and in an effort to enhance traffic and pedestrian safety.

Construction on this specialized project started in April and the completion date has been set back twice. Due to delays by the selected general contractor, the project completion date has been extended until the end of December.

“In managing projects such as this, city staff puts every effort toward keeping the project on schedule,” explains Tom Hartman, assistant director of the Public Works Department. “Unfortunately, there are still factors that are outside of the city’s control that lead to a delay that is as significant as this.”

Additional information on this project can be found at www.HarrisonburgVA.gov/pleasant-valley-road.

The City of Harrisonburg is centrally located in the Shenandoah Valley of Virginia. It is home to almost 55,000 people. More information about the City of Harrisonburg is online at www.HarrisonburgVA.gov.
