New Signal Installation Causes Lane Closures

Harrisonburg, VA – The Public Works Department will be installing underground conduit for two new traffic signals, which will result in some temporary lane closures.

Starting tonight, September 29, through Thursday, October 2 crews will be installing the conduit in four locations across South Main Street, from Pleasant Hill Road to Mosby Road, during the nighttime hours.

Work will take place from 9:00 p.m. until 7:00 a.m. due to the volume of traffic on this roadway during the day.

After the conduit installation is complete, the roadway will be repaved during the day on Wednesday, October 1 and Thursday, October 2.

One travel lane will remain open during the work but motorists are advised to use caution when traveling through the area.

The new traffic signals will eventually go in at the intersections of South Main Street and Mosby Road and South Main Street and Pleasant Hill Road.

This schedule is subject to change due to weather conditions and unforeseen maintenance on equipment that will be used to complete the project.
