Crews to Replace a Section of Waterline

Harrisonburg, Va. – The Public Utilities Department will work on replacing a portion of the city’s waterline next week, which will cause minor disruptions to traffic in Bridgewater.

On June 10 and June 17 from 6 a.m. until 10 p.m. city crews will be working at the intersection of Dinkle Avenue and College View Drive in Bridgewater. Approximately 200 feet of the 20 inch waterline will be replaced with new piping.

In recent months, crews have repaired multiple breaks in the waterline at this intersection, which has been a result of corrosion of the piping or bolts.

This particular waterline brings water directly from the North River to the city’s water treatment plant, where the water is treated and then delivered to the city’s customers. The North River, which is located in Bridgewater, is one of the city’s primary sources of water.

This schedule can be subject to change due to weather conditions and unforeseen maintenance on equipment.

Questions? Contact the Public Utilities Department for further information at 540-434-9959.
