Intermittent closures of Bruce Street at Liberty Street intersection *Changes to traffic flow to begin this evening*

HARRISONBURG, VA – Audible pedestrian signals are being installed around The Friendly City. Sometimes it takes only a day or so... sometimes longer. The installation of the Audible Pedestrian Signal at the intersection of Bruce Street and South Liberty Street is one that is going to take a bit longer.

There will be noticeable, temporary changes at this intersection as the intersection will need the signal cabinet replaced and much of the substructure, as well. While the upgrade is being installed, the signal light that normally governs the intersection will not be in operation.

(Above) The intersection of Bruce and Liberty streets. Changes to the flow of traffic in this area begin this evening.

Starting this evening, traffic on Bruce Street will have a stop sign and traffic on Liberty Street will flow freely through the intersection. The work will be done overnight, between 8 p.m. and 6 a.m., to minimize impacts to traffic that uses this intersection. Motorists should expect intermittent closures while the installation is in progress.

The upgrade is expected to take three weeks, weather permitting. Motorists need to be aware of the new traffic pattern and use appropriate caution.

*The **City of Harrisonburg** is centrally located in the Shenandoah Valley of Virginia. It is home to approximately 54,000 people. More information about the City of Harrisonburg is available online at www.HarrisonburgVA.gov.*
