PLAN SUBMISSION REQUIREMENTS

The checklist, shown below, lists the information which is required to be on each plan submitted for Fire Chief's review. Plans which are incomplete or are missing information, will be returned to the applicant(s).

- _____ Two sets of plans submitted (24"x36" minimum to 36"x42" maximum sheet size)

- _____ An inset Vicinity Map showing the location of the site, along with locations of street

- _____ Plan shows layout of existing and proposed streets

- _____ Plan shows layout of existing and proposed buildings, parking areas and travelways

- _____ Plan shows layout of proposed water system, including location of water mains, fire service lines, valve vaults, and fire hydrants

- _____ Plan shows the location of the closest existing fire hydrant on a City street or public easement

- _____ Plan indicates whether buildings will contain a sprinkler system, with the location of the fire department connection shown

- _____ Plan shows provisions for temporary fire protection when required

- _____ Two copies of the Insurance Services Office (ISO) Needed Fire Flow (NFF) calculations for proposed buildings

- _____ Copy of City flow test for the nearest existing fire hydrant

Note: On-site fire flow availability calculations may be required for remote sites
