Harrisonburg Police Cruisers Get a Facelift

The citizens of Harrisonburg will begin to see a new look of the Harrisonburg Police Cruisers patrolling their neighborhoods. The Police Department received their first of three new vehicles and they have a complete facelift of the past color scheme.

The new vehicles fall within the Department's Geographic Plan whereas Chief Monticelli wants the public to have no doubts when they see a police cruiser in their neighborhood. Monticelli really likes the traditional Black and White scheme and eventually all vehicles utilized by the department will follow that scheme. When a citizen sees a black and white the vehicle stands out. This is important for the contact between the beat officer and the citizen.
