## Stormwater Utility Fee Credit Calculations for Non-Residential Stormwater BMPs

Submit ONE Application Per BMP

### Parcel Information

Tax Map Parcel Number(s): \_\_\_\_\_

Parcel Street Address: \_\_\_\_\_

Annual Stormwater Utility Fee (billing unit @ \$6.00/ 500 sf impervious surface)  
 = impervious area × billing unit  
 = \_\_\_\_\_ × (sf × \$6.00 ÷ 500 sf)  
 = \$ \_\_\_\_\_ per year

Attach Site Plans or Drawings indicating drainage area entering BMP

Type of BMP = \_\_\_\_\_

**Step 1:** Determine the percent of impervious area draining to the BMP.

% Impervious Area Draining to BMP = impervious area draining to BMP ÷ total site impervious area  
 = \_\_\_\_\_ sf ÷ \_\_\_\_\_ sf  
 = \_\_\_\_\_ %

**Step 2:** Calculate the credit earned.

Stormwater Utility Fee BMP Type (A, B, or C) = \_\_\_\_\_  
 Stormwater Utility Fee Credit = \_\_\_\_\_ % impervious draining to BMP  
 % credit earned = stormwater utility fee credit % × % impervious area draining to BMP  
 = \_\_\_\_\_ % × \_\_\_\_\_ %  
 = \_\_\_\_\_ %

Credit earned = % credit earned × Annual Stormwater Utility Fee

= \_\_\_\_\_ % × \$ \_\_\_\_\_

= \$ \_\_\_\_\_ per year

(\*Calculations should be completed by an engineer or with the assistance of an engineer.)
