OBTAINING ARRIVAL DATA

Your Information When You Want It

Harrisonburg Transit is excited to offer a new route prediction service called NextBus! With NextBus, you can use your touch tone telephone, mobile device, or web enabled computer to see exactly where the bus is and its predicted time of arrival.

By Text Messaging

1. Text HDPT "Stop #" to 41411 (ex. HDPT 003)
 - a. Message and data rates may apply (based upon your plan with your cell carrier). At no point will NextBus charge you for their service.
 - b. Stop numbers can be obtained from bus stop signs or the schedule.
 - c. There must be a space between "HDPT" and the "Stop #" when texting.
 - d. For first time users, NextBus will prompt you with a welcome message.
2. Follow the prompted menu options.
3. To clear requested info and start over, text NBUS HDPT "Stop #" (ex. NBUS HDPT 009)

By Calling

1. Call 540-209-9068
2. When prompted, enter your stop number
 - a. Stop numbers can be obtained from bus stop signs or the schedule.

By Computer or Web-Enabled Cell Phone

Due to the variety of available phones, platforms, & browsers, the menus of NextBus may display differently.

1. Visit www.nextbus.com/homepage/
- 2a. Computer
 - a. Click the upper tab labeled "Find Your Next Bus".
 - b. Scroll down to Virginia and select "Harrisonburg Transit".
 - c. Select your desired route, or enter your bus stop number.
 - d. Select your direction (if applicable*).

*Some routes have been divided into two travel directions (ICS, Convo, NCS). Select the option that best matches the bus' direction while boarding.

 - e. Select your stop.
 - f. "Go to a page that can be bookmarked" (if you would like to bookmark this page for a quick reference).
- 2b. Web-Enabled Cell Phone
 - a. Follow the on-screen instructions (mobile web versions vary from phone to phone).

By QR Barcode (Smartphones)

1. Using any free QR mobile scanning app, scan the appropriate QR code
 - a. QR codes can be found in this booklet, on any bus stop sign, or online at www.hdpt.com

ADVANCED FEATURES

Personalized Convenience

NextBus allows individual users to sign up for personalized alerts. HDPT will use alerts to notify passengers of route changes due to delay, weather, or holiday schedules. These alerts can be one-time use specific, time specific, or route specific.

1. Visit www.nextbus.com/homepage/
2. Click the upper tab labeled "Find Your Next Bus".
3. Select "Harrisonburg Transit".
4. Click the left tab labeled "Automatic Alerts".
5. Click "Create a New Login".
 - a. Follow the onscreen instructions.
6. Select the alert you would like to create.

Immediate Alerts (also known as One-Time Alerts)

These alerts are often used while "in the moment". Most users will use this type of alert when they ride a bus outside of their regular ridership habits. If a business meeting finishes early or a grocery trip takes longer than expected, a passenger can create an Immediate Alert to notify them when their next bus is nearby (designated in minutes away).

Pros: There is no need to find times on a paper schedule, works off of real-time data
Cons: This alert only happens once (for regular reminders, see Scheduled Alerts)

Scheduled Alerts

These alerts are similar to Immediate Alerts except for the fact that they reoccur. This is perfect if you regularly catch the bus at the same time. Alerts can be set up every weekday or everyday.

Pros: There is no need to text, call, or visit the web to see if the bus is on time. NextBus will automatically text you when your bus is a certain distance away (designated in minutes away).
Cons: This alert will not notify you of any delays your bus may experience from the time you receive your alert to the time the bus actually arrives.

Watch Route Alerts

These alerts allow passengers to subscribe to specific routes. Once subscribed, passengers will have a direct feed from HDPT's dispatchers. Passenger will know if their selected route is delayed due to weather, traffic congestion, or railroad crossings. In addition, passengers will also be notified of any service changes due to road closures or holidays.

Pros: This alert provides a great snapshot of HDPT's routing calendar as well as major service delays when they occur.
Cons: An alert can be sent at anytime, even when a passenger has no need to catch a bus.
