Weight limit added for area of Country Club Road near Linda Lane

HARRISONBURG, Va. – A small section of Country Club Road in Harrisonburg will soon have a new weight restriction for vehicles that use the roadway.

The area, a stretch of pavement that crosses a culvert between Linda Lane and the Interstate 81 overpass near the Chaney Concrete Plant entrance, will be restricted to a 33-ton weight limit following an inspection that determined the limit was necessary due to the current condition of the culvert. The area is still safe for general passenger vehicles and can continue to be used by emergency response vehicles as needed. The City conducts similar bridge inspections across the community throughout the year, and this was a regularly scheduled inspection.

Harrisonburg Public Works will pursue funds in the near future to upgrade the culvert, which would eliminate the need for a weight restriction.

Vehicles over the restricted weight can utilize East Market Street instead.

The City of Harrisonburg is centrally located in the Shenandoah Valley of Virginia. It is home to approximately 56,879 people. More information about the City of Harrisonburg is online at www.HarrisonburgVA.gov.

(Above) A culvert crossing on Country Club Road will be given a weight limit of 33 tons in the coming days.
