## ITEM 1          VARIANCES

Provide a narrative of any variance request of either design or construction procedures. (Approval, if granted, of this variance must be properly denoted on the cover sheet of the drawings) (Re: 4.3.1)

## ITEM 2          GRADING & STRUCTURAL

Identify where this project impacts existing utilities in terms of cover depth, relocation requirements or denied/alternate access.

Provide ten-foot wide travel-way centered over proposed water and sewer utilities.

Provide calculations and design information on all casings.

Specify load concerns or design calculations for all pipe with less than three (3) feet of cover or greater than twenty (20) feet of cover; provide load calculations and available bearing strength (RE: 4.3.2)

ITEM 3            AVERAGE DAILY WATER AND SEWER DEMAND

A. Provide itemization of Average Daily Demand within all phases of the proposed development limits referring to the criteria set forth in Chapter 4.  
(Re: 4.3.3.3)

B. Provide itemization of Average Daily Demand within the area served exterior to the proposed development referring to the criteria set forth in Chapter 4. (Re: 4.3.3.3)

C. Provide total of Water and Sewer Average Daily Demand to be used for design by considering both the demand from within and exterior to the proposed development. (A + B) (Re: 4.3.3.3)

ITEM 4          CALCULATION OF DESIGN FLOW RATES

A. Provide the applicable peaking factor and maximum hourly (peak hourly) domestic flowrate for water demand. (Re: 4.3.4.1)

B. Provide calculations for maximum daily demand and needed fire flow (Re: 4.3.4.1 and 4.3.4.3)

C. **Water Design Flow Rate;** larger of A or B.

D. **Sewer Design Flow Rate;** Provide the applicable peaking factor and peak design flowrate for sewer demand. (Re: 4.3.4.2)

ITEM 7            EASEMENTS

Attach to this Report the preliminary plat, which identifies all proposed easement widths, types and locations. Identify placement of pipe within easement and width requirements based on pipe depth. If design requires changes to the preliminary plat, provide red-lined revisions, which will be made prior to recordation. (Re: 4.3.7)

ITEM 8            CONSTRUCTION COST ESTIMATE

Attach to this Report, or provide below, a construction cost estimate with itemization of unit prices, quantities and total estimated cost for Water and Sewer Utilities, (separate each type), to be installed by the Developer. If oversized mains have been required, provide the same itemization for the difference to be paid by the City. (Re: 4.3.8)

**CITY OF HARRISONBURG  
2155 BEERY ROAD  
HARRISONBURG, VA 22801**

DATE: \_\_\_\_\_

MEMORANDUM TO: Regional Director  
Division of Water

FROM: City of Harrisonburg

SUBJECT: Waterline Project Report

REFERENCE: Memorandum of Understanding, Local Review Program

PROJECT NAME: \_\_\_\_\_

PROJECT LOCATION: \_\_\_\_\_  
\_\_\_\_\_

PLANS PREPARED BY: \_\_\_\_\_

PROJECT CONSTRUCTION DATE: \_\_\_\_\_

Pipe: Size: \_\_\_\_\_ Length: \_\_\_\_\_ Material: \_\_\_\_\_

Water Source: \_\_\_\_\_

Average Production for Last Three Months: \_\_\_\_\_

Maximum Daily Demand: \_\_\_\_\_

Water Storage: Existing Capacity \_\_\_\_\_ MG  
Tank to Serve this Area \_\_\_\_\_

Tank Overflow Elevation \_\_\_\_\_ FT  
Tank Bottom Elevation \_\_\_\_\_ FT

Existing Service Area Evaluation After New Project Added:

Minimum Pressure \_\_\_\_\_ psi  
Maximum Pressure \_\_\_\_\_ psi  
Minimum Fire Flow Provided \_\_\_\_\_ psi

Hydraulic Capacity and Design: Pressures- Minimum \_\_\_\_\_ psi  
Maximum \_\_\_\_\_  
Using tank at \_\_\_\_\_

Fire Flow Provided

Number of Connections

Average Daily Usage

Domestic \_\_\_\_\_  
Commercial \_\_\_\_\_  
Industrial \_\_\_\_\_  
Other \_\_\_\_\_  
(Identify) \_\_\_\_\_  
  
TOTAL \_\_\_\_\_

Usage \_\_\_\_\_  
Usage \_\_\_\_\_  
Usage \_\_\_\_\_  
Usage \_\_\_\_\_  
Usage \_\_\_\_\_  
  
Usage \_\_\_\_\_

**Supplemental Site Plan Checklist  
For Water and Sewer Main Extensions  
"Plan View" Requirements**

Chapter 4 Reference	Design Requirement	OK	Deficiencies	
		( )	Sht #	Notes
	<b>Horizontal Location of Water or Sewer Main</b>			
4.4.1.1	Within right-of-way where possible			
4.4.1.2	Proper placement in right-of-way			
4.4.1.2	Right-of-way provisions for other utilities			
4.4.2.1	Private property easement identified			
4.4.2.2	Private property pipe location within easement			
4.4.3.2	Proper separation of parallel water and sewer mains			
4.4.3.3	Water and sewer crossings identified with proper alignment			
4.4.3.5	Proper horizontal separation of other parallel utilities			
4.4.3.5	All utility crossings identified with proper alignment			
	<b>4.4.4 Fire Hydrant Design</b>			
4.4.4.1	Public ownership			
4.4.4.2	One hydrant per 800 feet of pipe			
4.4.4.3	Pursuant to the Fire Chief's request			
4.4.4.4	Dead end mains			
4.4.4.5	Low point on main where feasible			
4.4.4.6	Street intersections			
4.4.4.7	Unobstructed placement			
4.4.4.8	50-100 feet from siamese connections			
4.4.4.9	Protected with a barrier			
	<b>4.4.5 Valve Design</b>			
4.4.5.1.1	5 feet from main on hydrant pipe feed			
4.4.5.1.2	5 feet from hydrant if feed greater than 50 feet or services proposed			
4.4.5.2	Four valves at crosses on mains			
4.4.5.2	Three valves at tees on mains
